SILVER PAINT - GT 4091

GT4091 paint is a single component acrylic resin binder silver paint

- **Metallisation of plastic, wood, paper**
- **Module shielding**
- **Static charge removal**
- **Conductive electrodes on insulating substrate**

Using instructions :

Applicable by brush, spray, gunn dipping etc.

Apply as thin a coat as possible. If applying a second or third coat, allow to dry between coats.

Drying time : 30 minutes approx at 20°C | 10 minutes at 160°C.

Resistivity is improved when polymerised at temperature (maximum 25°C) with polonged drying.

CHARACTERISTICS

Working temperature	-55°C to +100°C
Resistivity	0.05 Ω/sq
Density	1.80
Minimum coat thickness	10 μ
Coverage (for one 100g jar) depending in application	0.50m ² to 1.70m ²

Formats
250 gram bottle
